

PCB Artwork Punch

Description:

The Billows Protocol Artwork Punch can be manufactured with punching tools to suit any configuration. The Artwork Punch uses the latest high resolution cameras combined with our award winning vision software. The combination of the vision system and our punching expertise gained over 40 years provides our customer with an accurate and cost-effective machine.

Features:

- Advanced vision system for error free registration
- Fully automatic operation
- Pneumatic system for punching
- User friendly touch screen controls
- Punches and dies made from hardened tool steel
- Punches in fixed positions to avoid movement errors
- Large waste tray
- Virtually maintenance free
- Billows Protocol warranty
